EPA Reg. No. 279-3206

For use to supplement application of preconstruction borate primary treatments

24(c) Supplemental Label

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

This 24(c) label is only approved for use in conjunction with a pre-construction borate primary treatment. This label is not intended to authorize stand-alone use for the Exterior Perimeter / Interior Spot labeling in the State of Louisiana.

When a pre-construction borate primary treatment is used for control of subterranean termites and is applied according to label directions for use, TALSTAR PROFESSIONAL insecticide must be applied as an exterior perimeter pre-construction treatment using a 0.06% to 0.12% dilution after final grade is established. TALSTAR PROFESSIONAL must be applied to provide a continuous treated zone around the entire exterior foundation wall of the building. It is required that a complete and continuous treated zone be achieved around the entire exterior perimeter, including under any attached slabs such as garages, porches, patios, driveways, and pavement adjoining the foundation. TALSTAR PROFESSIONAL may also be applied to critical areas that include plumbing and utility penetrations (including bath traps), shower drain penetrations, along settlement cracks and expansion joints, and dirt filled porches.

For applications to the exterior perimeter and critical areas follow the instructions in the **SUBTERRANEAN TERMITE CONTROL Directions For Use** section of the Talstar Professional Insecticide label.

For MEDICAL Emergencies only, have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-(800)-331-3148 for Emergency Assistance.

For Information Regarding the Use of this Product Call 1-800-321-1FMC (1362) or visit our worldwide web site at www.fmcprosolutions.com.

As with any pesticide, always read and follow label directions.
